

The ART and SCIENCE of PARTICIPATION

If you have been using ToP methods for a while as a facilitator, you may feel that you want a deeper understanding of the methods in order to be a better, more professional facilitator. The Art and Science of Participation will bring new power and capacity to all your facilitation. A deeper understanding of ToP® will increase your prowess as a professional facilitator.

The Art and Science of Participation is a key component of both the Professional Facilitator Program and the Advanced Facilitator Program, which can prepare you for CPF certification and CToPF certification, respectively.

New Power and Capacity

THE ART AND SCIENCE OF PARTICIPATION is just the course that you need. This six day intensive look at the practice of facilitation will allow you to hone your facilitation skills in the security of a small group of like-minded individuals. This is a highly practical, highly participatory course. It contains a great deal of individual coaching, extensive practice in designing consultations and meetings, an exploration of the philosophy behind ICA's methods and the experience of classic applications of the basic methods. The course will dramatically improve your ability to facilitate effectively.

We ask that you bring your own facilitation experiences, projects and questions for practice and feedback.

This course has been endorsed by the International Association of Facilitators as part of the Professional Facilitator Program.

HOW THIS COURSE WILL BENEFIT YOU AND YOUR ORGANIZATION:

- Speed up your preparation times: Because you acquire a deeper understanding of the principals of facilitation, you can more easily adapt your facilitation techniques to any situation you face thus saving you time.
- By accessing the individual tutoring component of this course, you can deal with difficult situations more easily and quickly thus saving you money in the long run.
- You will be able to design more effective facilitation processes.
- You will be able to focus your Organizational Development work with greater precision to bring about needed change.
